-October 16th, 17th, 18th:

No School, Conferences (16th), MEA (17th, 18th)

Seesaw:

If you have not yet connected to your student's Seesaw journal, please do so as soon as possible! If you need another QR code, please let me know and I would be happy to email it to your or send a copy home with your student. You may also use the link below.

<https://app.seesaw.me/s/271-551-426>

School Forms:

If you still have school forms to turn in for your child, please do so as soon as possible. Thank you!

Classroom Money:

If you have not yet sent in your \$10 dollar donation for enrichment activities, please do so as soon as possible. The donations allows us to

do a variety of crafts and activities as extensions to our regular curriculum. Thank you!

At Home Expectations:

Each day your child will fill in an assignment notebook with work that is due and other important dates/items. Please be looking these over and helping to remind your student to complete the items. My nightly expectation is that they read 30 minutes (please sign reading calendar) and complete a page in their yellow packet if they did not complete it at school. If you have any questions about this, please do not hesitate to contact me!

We had a great first week together getting to know each other and learning our classroom rituals and routines! In reading, we went over how to choose a just right book and started building our reading stamina. We are up to reading 17 minutes at a time as a class! We began our first unit in math, which focuses on multiplication. Next week, we will begin using an app called Xtra math to practice our multiplication facts. We will also begin our first science unit on water.

If you have any questions, please do not hesitate to contact me!
